

# CONN GUARDIAN

*Safety Intelligence  
for People, Places,  
and Operations*

## TRANSFORMING EMERGENCY RESPONSE WITH THE CONNX GUARDIAN PLATFORM

ConnX Guardian brings together the technologies and workflows required to protect people and operations.

### DETECT EARLIER

AI-enabled signals from cameras, sensors, wearables, and alerts identify threats quickly.

### RESPOND FASTER

Automated workflows and coordinated communications reduce response time.

### COORDINATE ACTIONS

Security teams, leadership, and first responders operate from the same operational picture.

### IMPROVE OUTCOMES

Incident insights and reporting support continuous improvement and regulatory compliance.

## SAFETY INTELLIGENCE FOR PEOPLE, PLACES, AND OPERATIONS

ConnX Guardian is an integrated safety intelligence platform that helps organizations detect threats earlier, coordinate response faster, and protect people wherever they gather.

By unifying alerts, sensors, communications, and response workflows, ConnX Guardian transforms fragmented safety tools into a coordinated, real-time protection framework.

**Organizations need a coordinated approach to safety, not more disconnected tools.**

## THE SAFETY CHALLENGE

Safety technologies today often operate in silos. Panic buttons, cameras, sensors, communications systems, and alerting tools generate signals—but they rarely work together during an incident.

- 01 Slower emergency response
- 02 Confusion during high-stress events
- 03 Missed signals and delayed alerts
- 04 Increased safety and compliance risk

## Guardian Solutions

### Campus Guardian

Designed for K-12 schools, school districts, and higher education environments.

Capabilities include:

- Panic and duress alerting 
- AI-enabled threat detection
- Lockdown orchestration 
- Geo-fenced emergency notifications
- Medical emergency coordination

Campus Guardian helps schools improve safety readiness while supporting compliance with evolving safety mandates.

Campus Guardian helps schools meet Alyssa's Law requirements by enabling rapid panic alerting and coordinated emergency response across campus safety systems.

### Workforce Guardian

Extends the Guardian platform to enterprise and industrial environments.

Ideal for:

- Manufacturing and industrial sites
- Warehouses and logistics facilities
- Corporate campuses
- Healthcare environments

Capabilities include:

- Wearable duress alerts for workers
- Lone worker safety monitoring
- Environmental sensor integration
- Supervisor escalation workflows
- Incident coordination across locations

## PROTECT PEOPLE WHERE THEY GATHER

Safety risks exist across campuses, workplaces, and public spaces.

ConnX Guardian protects people wherever they learn, work, and gather.

### The ConnX Advantage

ConnX Guardian is designed to work with existing infrastructure, integrating communications, IT, OT, and safety technologies into a unified safety framework.

ORGANIZATIONS GAIN:

- ✓ Faster incident detection
- ✓ Coordinated emergency response
- ✓ Improved situational awareness
- ✓ Reduced operational risk
- ✓ Stronger safety assurance for employees, students, and communities

ConnX helps organizations modernize infrastructure, enhance safety, and mitigate risk through connected intelligence.
