

MaestroIQ

Operational
Intelligence for
State & Local
Government

THE CONNX APPROACH: VISIBILITY → INSIGHT → ACTION

MaestroIQ unifies infrastructure, public safety, and operational systems into a single, real-time intelligence layer—enabling faster decisions, improved services, and safer communities.

SEE EVERYTHING

Unified visibility across operations, assets, agencies, Infrastructure

KNOW WHAT MATTERS

AI identifies risks, anomalies, and trends

ACT IN REAL TIME

Automated alerts and workflows enable immediate response

PREDICT WHAT'S NEXT

Anticipate issues and prevent operational disruption

WHAT MAESTROIQ DOES

MaestroIQ connects and unifies existing government infrastructure—without rip-and-replace—creating a Shared Intelligence Layer across across agencies and operations.

By correlating data from public safety systems, infrastructure, communications, and field operations, MaestroIQ enables **real-time situational awareness and coordinated response across departments.**

The result:

Faster decisions. Better coordination.
More resilient public services.

Government operations don't need more systems —they need coordination across agencies.

THE CHALLENGE

Government systems often operate in silos

Departments, infrastructure, and public safety systems generate data—but rarely work together in real time

- 01** Systems operate in silos across departments and agencies
- 02** Data is fragmented, delayed, or incomplete across systems
- 03** Teams lack real-time visibility, impacting incident response
- 04** Incidents are detected late and resolved slowly
- 05** Coordination gaps increase operational risk

Core Capabilities

AI-Driven Insights
Detect anomalies, predict risks, and surface what matters most

Real-Time Data Fusion
Correlates data across public safety, infrastructure, and operations

Orchestration & Automation
Trigger alerts and coordinate response across agencies

Unified Operational Visibility
One real-time view across departments, systems, and infrastructure

Command Center Enablement
Centralized dashboards for operations and emergency response

Deployment Models

MaestroIQ Core (Platform-as-a-Service)

Operate and manage systems with full visibility and control

MaestroIQ 360 (Fully Managed Service)

ConnX delivers 24x7 monitoring, response, and lifecycle management

Government Use Cases

Public Safety & Emergency Response

- Monitor incidents across police, fire, and EMS systems
- Integrate alerts, video, and communications
- Enable faster, coordinated response Coordinate racross agencies during real-time incidents

Infrastructure & Operations

- Monitor traffic systems, facilities, and public assets
- Correlate system performance with operational events
- Improve uptime and service delivery

Cross-Agency Coordination

- Share real-time data across departments
- Improve communication and decision-making
- Eliminate gaps between agencies

Outcomes That Matter

01 Faster, more coordinated response across departments and agencies

02 Improved emergency management and incident coordination

03 Strengthened continuity of operations and overall resilience

04 Real-time visibility across infrastructure and operations

05 Reduced operational risk and improved response readiness

The ConnX Advantage

- Unify what others leave siloed
- Connect, don't replace
- From visibility to action
- Built for mission-critical environments
