

MaestrolQ

Operational
Intelligence for
Healthcare
Environments

THE CONNX APPROACH: VISIBILITY → INSIGHT → ACTION

MaestrolQ unifies clinical, operational, and facility systems into a single, real-time intelligence layer—improving response times, patient safety, and care delivery.

SEE EVERYTHING

Unified visibility across clinical, operational, and facility systems

KNOW WHAT MATTERS

AI identifies risks, anomalies, and trends

ACT IN REAL TIME

Automated alerts and workflows enable immediate response

PREDICT WHAT'S NEXT

Anticipate issues and prevent care disruption

WHAT MAESTROIQ DOES

MaestrolQ connects and unifies existing healthcare systems—without rip-and-replace—creating a Shared Intelligence Layer across across clinical and operational environments.

By correlating data from clinical alerts, devices, communications, and facility systems, MaestrolQ enables **real-time situational awareness and coordinated response across care teams.**

The result:

Faster response. Improved patient safety. More efficient care delivery.

Healthcare systems don't need more data—they need real-time coordination.

THE CHALLENGE

Healthcare systems often operate in silos

Clinical, operational, and communications systems generate data—but rarely work together in real time

- 01 Systems operate in silos across care and operations
- 02 Data is fragmented across systems
- 03 Teams lack real-time visibility
- 04 Critical events are detected late
- 05 Delays increase risk to patient safety

Core Capabilities

AI-Driven Insights
Detect anomalies, predict risks, and surface what matters most

Real-Time Data Fusion
Correlates alerts, devices, communications, and system data

Orchestration & Automation
Trigger alerts and coordinate response across care teams

Unified Operational Visibility
One real-time view across clinical, operational, and facility systems

Command Center Enablement
Centralized dashboards for operations and clinical response

Deployment Models

MaestroIQ Core (Platform-as-a-Service)

Operate and manage systems with full visibility and control

MaestroIQ 360 (Fully Managed Service)

ConnX delivers 24x7 monitoring, response, and lifecycle management

Healthcare Use Cases

Clinical Alerts & Response

- Monitor patient alerts and clinical events in real time
- Integrate nurse call, monitoring devices, and communications
- Enable faster, coordinated care response

Hospital Operations

- Monitor systems, workflows, and operational performance
- Improve coordination across departments
- Reduce delays in care delivery

Facilities & Asset Tracking

- Track medical equipment and critical assets
- Monitor facility systems and environmental conditions
- Improve utilization and operational efficiency

Outcomes That Matter

03 Real-time visibility across clinical and operational systems

01 Improved reliability of systems supporting clinical workflows

04 Support for compliance with healthcare regulations (e.g., HIPAA)

02 Faster identification and resolution of system issues

05 Reduced operational risk and improved continuity of care

The ConnX Advantage

- ✓ Unify what others leave siloed
- ✓ Connect, don't replace
- ✓ From visibility to action
- ✓ Built for mission-critical environments
