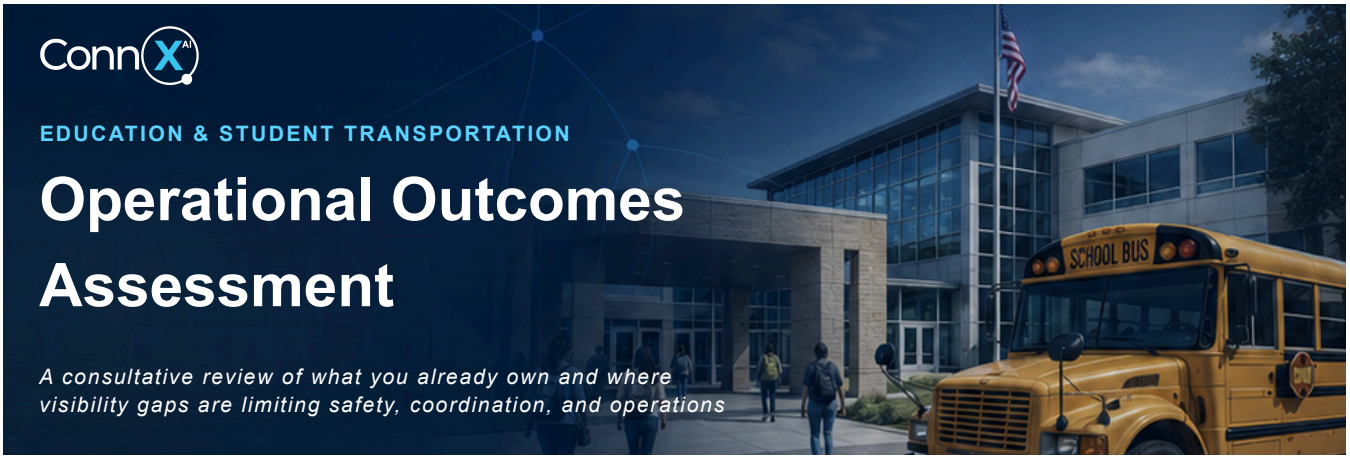
EDUCATION & STUDENT TRANSPORTATION

Operational Outcomes Assessment

A consultative review of what you already own and where visibility gaps are limiting safety, coordination, and operations



You Already Own Most of What You Need

School districts and student transportation providers already operate cameras, access control, radio systems, dispatch tools, transportation software, networks, and emergency communications. The challenge is not whether the technology exists. The challenge is whether teams can see across it clearly enough to act faster, coordinate better, and reduce risk.

For School Districts

K–12 districts seeking better coordination across safety, operations, and transportation

For Student Transportation Providers

Private and contracted transportation operators seeking stronger visibility, communication, and service resilience

5 Areas We Review Together

01

Transportation Operations

Fleet visibility, routing, dispatch workflows, vehicle communications, and contractor coordination.

02

Safety & Incident Awareness

Cameras, alerts, emergency response workflows, and situational awareness across teams

03

Unified Communications

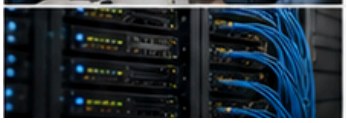
Voice, radio, messaging, call flows, and communication continuity

04

Cross-Team Visibility

How operations, transporatation, safety, IT, and leadership share information and respond

05



Integration & Infrastructure Evolution

Existing systems, data silos, manual workarounds, and practical next steps

DISCOVER

We meet with key stakeholders to understand your environment, priorities, and pain points.

REVIEW

We examine existing systems, workflows, and visibility gaps affecting operations, safety, and transportation.

PRIORITIZE

We identify the most important opportunities to improve coordination, reduce blind spots, and strengthen performance.

ROADMAP

We deliver practical recommendations and a phased path forward aligned to your goals and resources.

ConnX AI

WHAT THE ASSESSMENT INCLUDES

A Clear, Low-Lift Process

Built around your schedule, your existing environment, and your operational goals.

What You Walk Away With

Current-State Map

A clear view of your existing systems, workflows, and visibility dependencies

Prioritized Opportunity & Gap List

The most important operational, safety, and coordination gaps to address first.

Phased Roadmap

Practical next steps aligned to budget, effort, and readiness.

Funding View

Relevant planning considerations and potential funding pathways for future improvements.

Low Friction by Design

- Conversation-based
- No Rip-and-Replace
- No agents installed
- Findings are yours to keep
- Existing systems stay in place
- No obligation

A Consultative Assessment Designed to Clarify What you Have, What is Connected, and What Becomes Possible Next

What This Helps You Do

- Improve Operational Visibility
- Reduce Risk & Blind Spots
- Strengthen Coordination Across Teams
- Support Smarter Planning & Investment Decisions
- Build a Clearer Path for Future Improvements

See What Your Operation Looks Like Connected

- ☑ Schedule Your ConnX Operational Outcomes Assessment
- ☑ No Rip & Replace - See Opportunities to Connect What You Already Own
