

MaestrolQ

ORCHESTRATION AND
OBSERVABILITY PLATFORM

TURN FRAGMENTED INFRASTRUCTURE INTO REAL-TIME INTELLIGENT OPERATIONS

Visibility → Insight → Action

SEE EVERYTHING

Unified visibility across systems, assets, networks, and environments

KNOW WHAT MATTERS

AI-driven analytics identify risks, anomalies, and performance issues

ACT IN REAL TIME

Automated alerts and workflows enable immediate response

PREDICT WHAT'S NEXT

Anticipate failures, optimize operations, and prevent disruption

WHAT MAESTROIQ DOES

MaestrolQ connects and unifies existing infrastructure—without rip-and-replace—creating a Shared Intelligence Layer across your entire environment.

By correlating data from IT systems, operational technology, IoT devices, communications platforms, and field operations, MaestrolQ transforms disconnected signals into real-time operational awareness and coordinated action.

The result:

Clarity across complexity. Control across operations. Confidence in every decision.

**MaestrolQ turns data into decisions—
and decisions into action.**

THE CHALLENGE

Modern infrastructure environments are not designed to work together.

- 01** Systems operate in silos
- 02** Data is fragmented, delayed, or incomplete
- 03** Teams lack real-time visibility
- 04** Incidents are detected late and resolved slowly
- 05** Risk increases as complexity grows

Core Capabilities

AI-Driven Insights

Detect anomalies, predict failures, and surface what matters most

Real-Time Data Fusion

Correlates telemetry, video, network data, and operational signals into a single context

Orchestration & Automation

Trigger alerts, workflows, and cross-system actions in real time

Unified Operational Visibility

One real-time view across IT, OT, IoT, communications, and field systems

Command Center Enablement

Power centralized operations with live dashboards and coordinated control

Deployment Models

MaestroIQ Core (Platform-as-a-Service)

Operate and manage your environment with full visibility and control

MaestroIQ 360 (Fully Managed Service)

ConnX delivers 24x7 monitoring, response, and lifecycle management

Use Cases

Transit

Real-time fleet, infrastructure, and incident coordination to improve service reliability and rider safety

Education

Unified campus safety and communications for faster emergency response and real-time situational awareness

Manufacturing

Predictive monitoring of equipment and production systems to reduce downtime and optimize throughput

Connected Communities

Unified view of traffic, safety, utilities, and public services to enable smarter, safer, and more efficient communities

Utilities

Real-time monitoring of grid, substations, and field operations to improve reliability, resilience, and response times

Retail

Store-wide visibility across POS, network, and in-store systems to protect revenue and enhance customer experience

Healthcare

Integrated clinical alerts, asset tracking, and communications to improve response times and patient safety

State & Local Government

Cross-agency visibility and coordination for infrastructure, public safety, and emergency response operations

The ConnX Advantage

- ✓ Unify what others leave siloed
- ✓ Connect, don't replace
- ✓ From visibility to action
- ✓ Built for mission-critical environments
