LDOS READINESS ASSESSMENT

MODERNIZE INFRASTRUCTURE • ENHANCE SAFETY • MITIGATE RISK

The Challenge

Cisco equipment eventually reaches Last Date of Support (LDOS) — the point where security patches, updates, and manufacturer support stop. That's when reliability, safety, and compliance risks rise sharply.
ConnX, powered by Cisco, helps organizations stay ahead of LDOS with a lifecycle visibility assessment that identifies at-risk assets, prioritizes upgrades, and builds a modernization roadmap that fits your budget and operations.

Why ConnX Cisco

- **Unified visibility across IT, OT, and IoT assets nearing LDOS**
- **AI-driven monitoring through MaestroIQ AIOps**
- **Lifecycle management insights for Cisco hardware and software**
- **Clear roadmap for modernization and funding alignment**
- **Seamless upgrade path to secure, supported Cisco platforms**

"We don't just find risks — we help you modernize before LDOS impacts your mission."

Assessment Process at a Glance

Discovery Call

Define goals, environment, and support needs

Data Collection

Collect device inventory, serials, and firmware data

Analysis & Benchmarking

Map assets to Cisco lifecycle database and LDOS milestones

Customized Report

Deliver visual risk heatmap and prioritized modernization plan

Next Steps

Option to extend into ConnX Managed Services for ongoing lifecycle management

www.connxai.com +1-609-438-6100 connxsales@connxai.com

What's Included

Device Lifecycle Audit	Complete inventory of Cisco devices across sites, models, and software versions
LDOS Risk Heatmap	Visual ranking of assets by lifecycle stage: Active, Approaching, or Past Support
Upgrade & Modernization Plan	Phased recommendations for replacement, refresh, or extended service
Funding & Compliance Guidance	Identify eligible Cisco programs and grants supporting modernization

Deliverable Pack Includes

- LDOS Readiness Report
- Modernization Roadmap
- 90-Day Action Calendar
- Optional MaestroIQ Dashboard Access

THE CONNX DIFFERENCE

Unified Visibility
Real-time insights across IT/OT/IoT environments

Proactive Defense
Predictive maintenance and secure refresh before failures occur

Regulatory Confidence
Compliance-ready modernization plans

Operational Resilience
Reduced downtime and faster support transitions

Future Ready
Built on Cisco's industrial networking roadmap with ConnX lifecycle management

Proven Impact

- **Reduced unplanned downtime by 30% through proactive lifecycle management**
- **Enabled faster incident response for DOTs and healthcare systems using MaestroIQ observability**
- **Helped businesses secure grant funding for modernization and LDOS remediation**

Protect What Matters Most
Stay supported, secure, and ready.
